9 January 1978

MEMORANDUM FOR: Chief, Plans and Programs Staff, NFAC

SUBJECT : OIA Communications Requirements for FY-80  
Through FY-84

1. This memorandum is in response to your request for the Office of Imagery Analysis projected communications requirements during FY-80/84.

Secure voice. We anticipate no expansion in our need for secure voice communications during FY-80 through FY-84. The greatest growth will have occurred during FY-79 with the acquisition of [REDACTED] OIA foresees no new requirements for secure voice service to agencies not currently accessible.

25X1A

Data service. During FY-80 through FY-84 OIA will continue to rely heavily upon ODP for data processing support and we anticipate a need for a maximum of two additional terminals each year during the period. Both terminals should access GIMPROD, VM and interim SAFE. We also expect implementation of the final SAFE system during FY-80 through FY-84 and will require the appropriate data communication lines.

2. Questions regarding this memorandum may be directed to me on extension [REDACTED]
